Friendship

Autumn 2020

Friendship (Think)

Friendship is one of the most important things in life. Life would be different with no friends.

There is more to friendship than I first thought.

Treat others how you want to be treated.

It means that someone you can rely on is always there for you. They won't focus on your mistakes but your successes.

Friends are trustworthy people that will help you no matter what.

Friends shouldn't focus on the 'broken fence' but the 'beautiful flowers' it lets them see.

You don't need to have lot of friends to know what friendship is you just need one or two special friends to know what true friendship is.

If you have a friend by your side when you are at your lowest they will always help you up (that's what my dad said).

Heart (Feel)

I felt that friends can cheer you up but they all can play several different roles.

It has made me feel that friendship is important and you should be kind to everyone.

It has made me feel grateful for the friends I have.

It has shown me how I treat my friends like they are part of my family.

I feel safer expressing my thoughts and emotions to my friends.

Without friendship the world would be full of hate.

I feel grateful because I have friends to help me get better at things.

You have to earn each other's trust to be friends.

Feet (Change)

I am going to treat people the same.

I will try to respect and tolerate my friends' decisions if I disagree with them.

It is important to be kind to friends and family.

That if someone has fallen down we should help them up.

If someone is being mistreated, tell an adult to help.

I will try to help friends who have disagreements because friendship is important.

I will make sure everyone has someone to play with.

You should treat all people equally whether they're your friends or not.
